

Hybrid Millet : HM-535

Salient Features

- Long panicle completely filled with grains
- Medium plant height
- More number of tillers & more production
- Lodging and disease resistance
- Stay green character

Crop Agronomy

| | |
|--------------------------------------|-------------------------|
| Pack Size: | 2 Kg |
| Sowing Period : | May – Mid August |
| Seed Rate Per Acre: | 2 Kg |
| Sowing distance between rows/ridges: | 1.5 ft. |
| Sowing distance between plants: | 4 inch |
| Sowing Depth: | 3-5 cm |

Production Technology

| | |
|---------------------------|--|
| Sowing Method | Sow the seeds on ridges at a distance of 4 inches. Seeds can also be sown by broadcasting. |
| Fertilizer | <p>Land Preparation: 1Bag DAP + 1 Bag Potash + ½ Bag Urea</p> <p>At 1st irrigation : 1 Bag Urea</p> <p>At Panicle emergence: 1 Bag Urea</p> |
| Irrigation | Depending upon soil & environmental conditions, 1 st irrigation should be applied after 3-4 days in irrigated areas. Water stress should be avoided at panicle emergence and flowering stage. |
| Disease & Pest Management | Keep proactive measures regarding to diseases & insects controlling measures at their respective ETL level |
